

Roundtable on the Crown of the Continent  
*Connecting People to Sustain and Enhance Culture, Community and Conservation*

## **7th ANNUAL CONFERENCE AGENDA**

### ***“One Backyard: Celebrating a Shared Landscape”***

October 13-14, 2016

Fernie Best Western

Fernie, British Columbia

#### **About the Annual Conference**

The annual conference serves as one of the primary vehicles to achieve the core mission of the Roundtable—to connect people to enhance culture, community and conservation in the Crown of the Continent. During the past six years, this conference has moved around the Crown to feature and celebrate different regions. The organizing theme of the 7th annual conference is “One Backyard: Celebrating a Shared Landscape.” We will explore how the challenges and changes in our businesses, cultures, communities and landscapes are within our shared experience, transboundary in nature, and cause for partnerships and celebrations.

#### **Objectives and Expected Outcomes**

1. Exchange new information and ideas, connect people working on similar issues, and foster a sense of regional identity;
2. Celebrate the links among the culture, community, and conservation values of the Crown of the Continent and how people are working to enhance these values; and
3. Examine two compelling issues facing the Crown of the Continent – impacts and opportunities from visitors and how culture inspires conservation - and build our collective capacity to address them at a local and regional scale.

#### **About the Roundtable**

The Crown of the Continent region is a remarkable, ecologically intact ecosystem rich in tribal history, natural resources, and thriving communities. This 18-million acre region is threatened by climate change, loss of traditional knowledge, growth, and development. The Roundtable on the Crown of the Continent addresses these challenges by providing a forum for collaboration and networking among Tribes/First Nations, land management agencies, local governments, private land partnerships, academia, conservation groups, businesses, and industry.

Large landscape conservation is participatory and inclusive and the Roundtable connects people to enhance the culture, communities, and conservation of the region. Our transboundary, large landscape effort provides a platform for diverse perspectives to share information, build knowledge and capacity, celebrate success, and catalyze new efforts and partnerships. The Roundtable seeks to achieve a shared vision for people and nature in the region. For more information, please go to [www.crownroundtable.org](http://www.crownroundtable.org).
